JARED R. REMIEN

New York, NY | jaredremien21@gmail.com | linkedin.com/in/jared-remien/

Summary

Enterprise technology architect with deep experience advising Fortune 500 firms on complex technology strategy, architecture decisions and platform adoption. Combines executive-level communication with hands-on AI fluency, advising large enterprises on integrating emerging technology into ecosystems. Trusted advisor across financial services, known for translating technical complexity into clear business value.

Experience

Ernst & Young **New York, NY**

Manager - Technology Strategy & Architecture Advisor *Jan 2026 – Present*

- Led end-to-end program delivery for an enterprise governance redesign spanning 25 technology domains, including roadmap definition, workstream coordination, and program risk management.
- Designed and deployed multiple production AI agents leveraging the Claude API and OpenClaw orchestration platform, including a personal architecture assistant, a daily research engine, and a task automation. Developing fluency with LLM integration patterns, prompt engineering, and agent design.
- Architected and implemented the operating model for a 5-year, 800-person migration program, owning delivery governance, dependency management, and executive stakeholder alignment.
- Designed and implemented an enterprise application complexity model across 10 LOBs, standardizing CIO-level portfolio visibility to inform investment planning and governance rigor.
- Advised on full automation of validation and evidence ingestion for 31 non-functional requirements, significantly reducing manual testing effort and accelerating migration timelines.

Senior – Technology Transformation Advisor *Oct 2020 – Dec 2025*

- Oversaw a capital plan across 8 CIOs, aligning $300M in technology investments to strategic priorities.
- Modernized a major bank's ITSM practices via ServiceNow, achieving 90% reduction in costly customizations while improving data quality through adoption.
- Designed automation-first future-state delivery models via ServiceNow agents for Change and Release processes, improving governance consistency and execution speed.
- Led technical architecture and enterprise adoption of GitHub Copilot and GHEC for a Global Bank, guiding engineering teams through integration, defining governance guardrails, and driving an 18% productivity increase over 6 months.
